I am totally hooked on Satellite radio. While I only have it in my home at the moment and not in my car (problem with installing it in the dash) if the NAB is able to stop Traffic and weather on XM I will do whatever it takes to get an XM receiver in my vehicle. If Broadcasters are able to manipulate the system then quite frankly I can live without AM/FM (I am sick of the commercials and the insipid DJ's anyway). If I need a weather or traffic report I can always check my computer. (or does the NAB plan to put a stop to that also?)Keith Carroll
